DETAILED ACTION

Allowable Subject Matter

1. Claims 2-5, 8-20 and 22-32 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 5, 12-15, 18 and 20, the closest prior art to the claimed subject matter is Flammer in view of Hamabe. Flammer in view of Hamabe disclose an apparatus and method for transferring traffic information in units between a transmitting station and a receiving station comprising selecting transmission power levels in sequential steps from a minimum transmission power. However, none of prior art of records teaches that the first power level is selected to increase a probability of failed first information units transmission and of consequent second information units transmission and to minimize average power consumption taking into account the first power level and the second power level as argued by the Applicant's response filed on 08/11/2004 (See Remark, page 2-3).

Claims 2-4, 8-11, 19, and 22-32 are allowed as being depended on independent claims that have been allowed.

Regarding claims 16-17, the closest prior art to the claimed subject matter is Flammer in view of Hamabe. Flammer in view of Hamabe disclose an apparatus and method for transferring traffic information in units between a transmitting station and a receiving station comprising selecting transmission power levels in sequential steps from a minimum transmission power. However, none of prior art of records teaches that

the second information units include forward error correction information associated with the first information units as argued by the Applicant's response filed on 08/11/04 (See Remark, page 6-7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
